DANDI TRIMAKNO

BACKEND ENGINEER · PHP & LARAVEL · RESTful API & INTEGRATION

Klaten, Indonesia · Open to Remote / Hybrid · +62 877-3490-0685 · dandhitrimakno@gmail.com · linkedin.com/in/dandhi-trimakno

PROFILE

Backend Engineer with 5+ years of hands-on experience building and maintaining production web applications and RESTful APIs with PHP, Laravel, and CodeIgniter. Strong in layered API development (Controller → Form Request → Service → Repository) with Swagger/OpenAPI documentation, third-party integrations (Xendit payments, Firebase/FCM, external REST APIs), MySQL/PostgreSQL query optimization, Redis caching, and automated testing with PHPUnit/Pest. Comfortable working independently or within a team, with experience coordinating small teams as Project PIC when needed.

TECHNICAL EXPERTISE

BACKEND
PHP · Laravel · CodeIgniter · RESTful API · Swagger/OpenAPI · Service Layer · Repository Pattern · Form Request Validation · Modular Architecture

DATABASE
MySQL · PostgreSQL · ERD · Indexing · Query Optimization · EXPLAIN · Transactions · Views · Stored Procedures

INTEGRATION
JWT · Xendit · Firebase/FCM · Guzzle · External REST APIs · Two-way API Integration

PERFORMANCE
Redis · Laravel Cache · PHPRedis · Query Optimization · Caching Strategy

FRONTEND
HTML · CSS · Bootstrap · JavaScript · jQuery · AJAX · Vite · SCSS

TESTING & TOOLS
PHPUnit · Pest · Automated Testing · Git · GitLab · Docker · CI/CD collaboration

PROFESSIONAL EXPERIENCE

PT TIME EXCELINDO — Yogyakarta, Indonesia

Web Developer | June 2021 – Present

- Develop and maintain production web applications and RESTful APIs using PHP, Laravel, and CodeIgniter.
- Integrate third-party services and external systems, including Xendit payments, Firebase Cloud Messaging, Google Translate, and two-way government system APIs.
- Design databases and optimize queries using ERD, relationships, indexing, EXPLAIN, migrations, transactions, views, and stored procedures.
- Apply Redis caching to high-frequency endpoints and handle production troubleshooting on large active databases.
- Write automated tests with PHPUnit/Pest since early 2024 (starting with VMS) to keep features stable as projects grow.
- Build reusable service/helper flows so business logic stays consistent and is not duplicated across developers.
- Work with Git/GitLab branching workflows, resolve merge conflicts, and support deployment with the team.
- Progressed from Junior Web Developer; since 2024 also trusted as Project PIC for teams of 2–3 developers, handling estimation, task distribution, and technical review.

SELECTED PROJECTS

LHA · Developer / Project PIC · Web app 2024 · REST API 2026 (completed)

- Developed the web application independently in 2024, then completed its API modernization in 2026 with a new Laravel 13 / PHP 8.5 REST API and the planned migration work.
- Structured the API in layers — Controller → Form Request → Service → Repository — separating validation, business logic, and data access to keep the codebase clean and maintainable.
- Shipped Swagger/OpenAPI documentation with the deployed API as the interface/contract for API consumers, making endpoints easy to explore, test, and integrate.

Freelance — Sistem Informasi Kepegawaian API · Backend Developer · May 2025 – May 2026

- Independently developed approximately 60–70 production RESTful API endpoints.
- Built two-way integration with a government personnel system using Controller → Service → Repository → Model architecture.
- Applied Redis caching to selected high-frequency endpoints and supported integrations across multiple institutions under the client.

SIK — Sistem Informasi Kepegawaian · Backend Developer / Maintenance

- Production HR system used by Pusdatin with approximately 30,000–60,000 users nationwide.
- Handled maintenance, backend/API development, production troubleshooting, database optimization, and performance work on a large active database.
- Applied Redis/PHPRedis caching to frequently accessed endpoints, including SSO-related functionality.

SIManawa Apps · Backend Developer

- Built RESTful APIs with CodeIgniter/PHP and continued maintenance and feature development.
- Implemented Firebase Cloud Messaging and Xendit payment integration covering e-wallet/bank transfer, invoices, webhook callbacks, payment statuses, and scheduled handling for failed/pending payments.

E-Ponti API · Project PIC / Backend Developer

- Built the RESTful API from scratch and implemented Firebase Cloud Messaging for application notifications.

DNP · Full-Stack Developer / Team Member · 4–5 developers

- Contributed to a complex Laravel 13 / PHP 8.4 modernization project involving migration, dashboard development, flow changes, reusable service abstractions, and Google Translate integration.
- Worked as a full-stack team member and created reusable base flows/helpers so other developers could use consistent implementations.

Other Projects · Project PIC / Lead (hands-on) · teams of 2–3 developers

- **VMS — Vendor Management System:** production system for RSAB Harapan Kita and Bank Mandiri, delivered in ~3–4 months (2024) with automated tests (PHPUnit/Pest).
- **MVP — Management Vendor PON:** production system for Rumah Sakit Otak Nasional and Bank Mandiri, delivered in ~3–4 months.
- **SIPIJAK:** Laravel 12 / PHP 8.4 public and admin application with multiple dashboards for Pemda Bekasi.
- **DIGILUH:** Laravel 12 / PHP 8.4 Web + REST API application using modular, service-oriented architecture.
- **PPIC Curug:** dashboard-oriented academic system.

ADDITIONAL TECHNOLOGIES

Go · Gin · Python · Node.js · Express.js · NestJS — Beginner / currently learning

EDUCATION

Bachelor's Degree in Informatics — Universitas Amikom Yogyakarta · 2017–2021
GPA: 3.76/4.00 · Graduated July 2021 · Amikom Computer Club
Thesis: Comparison of Convolutional Neural Network and K-Nearest Neighbor Algorithm for Classification of Batik Motif Patterns with Digital Image

LANGUAGES

Indonesian — Native · English — Intermediate (strong reading & writing; improving speaking/listening)
